MATCHING**60 : 40**

How a pair works

60 / 40

Stronger leg contributes 60%, weaker 40%. Surplus carries forward and never expires.

What it pays on

Daily ROI

Generation is calculated on that day's downline ROI, not on principal. Salary uses matched team business.

Left and right volume live on the genealogy page. Auto-placement fills the weaker leg unless a sponsor chooses a side.
